**MODULE 3- MODELLING**

| SL NO | QUESTIONS                                                                                                 | MARKS | COs | BL |
|-------|-----------------------------------------------------------------------------------------------------------|-------|-----|----|
| 1     | State and explain designing modeling principal.                                                           | 05    | C03 | L2 |
| 2     | State requirement modeling principal.                                                                     | 05    | C03 | L1 |
| 3     | Explain Principal that guides the each frame work activity                                                | 06    | C03 | L2 |
| 4     | State and explain construction principal.                                                                 | 06    | C03 | L2 |
| 5     | Explain testing principals.                                                                               | 06    | C03 | L2 |
| 6     | Explain deployment principal                                                                              | 06    | C03 | L2 |
| 7     | How can you develop an effective use case? Develop UML use case diagram for home security function.       | 10    | C03 | L3 |
| 8     | Explain class diagram for the system class.                                                               | 08    | C03 | L3 |
| 9     | State and explain activity diagram for camera surveillance via the internet display camera view function. | 10    | C03 | L3 |
| 10    | Explain class diagram for the floor plan modeling                                                         | 08    | C03 | L3 |
| 11    | What are the steps involved to construct Behavior model                                                   | 10    | C03 | L1 |
| 12    | What is abstraction explain the concept of abstraction.                                                   | 10    | C03 | L2 |
| 13    | Explain Modularity and software cost with neat diagram                                                    | 10    | C03 | L2 |
| 14    | Explain functional independence.                                                                          | 10    | C03 | L2 |
| 15    | Define Unified Modeling Language(UML) .Explain Use case Diagram                                           | 08    | Co3 | L1 |

### **Module 4 - SOFTWARE REQUIREMENTS**

| SL NO | QUESTIONS                                                                                           | MARKS | COs | BL |
|-------|-----------------------------------------------------------------------------------------------------|-------|-----|----|
| 1.    | List any four requirement elicitation techniques.                                                   | 5     | C03 | L1 |
| 2.    | Define Requirement Engineering. List its key activities.                                            | 6     | C03 | L1 |
| 3.    | State two differences between scenario-based and class-based modelling.                             |       |     |    |
| 4.    | How Requirement engineering it works explain in detail.                                             | 10    | C03 | L1 |
| 5.    | What is a Use Case? Give one example.                                                               | 5     | C03 | L1 |
| 6.    | Explain the steps in establishing groundwork for requirement gathering.                             | 6     | C03 | L2 |
| 7.    | Describe requirement validation and its importance.                                                 | 6     | C03 | L2 |
| 8.    | Explain scenario-based requirement modelling with an example.                                       | 6     | C03 | L2 |
| 9.    | Discuss class-based and behavioural-based requirement modelling methods.                            | 8     | C03 | L2 |
| 10    | Explain the different steps in Requirement Engineering with neat points.                            | 10    | C03 | L2 |
| 11    | Describe Requirement Elicitation Techniques with suitable examples                                  | 10    | C03 | L2 |
| 12    | Describe the process of validating requirements with an example.                                    | 6     | C04 | L2 |
| 13    | Differentiate between negotiating requirements and validating requirements.                         | 6     | C04 | L2 |
| 14    | Apply the steps of requirement engineering to a “Library Management System.”                        | 10    | C04 | L3 |
| 15    | Analyse how requirement negotiation helps resolve conflicts among stakeholders.                     | 10    | C04 | L3 |
| 16    | Apply requirement elicitation techniques to develop use cases for an <b>Online Shopping System.</b> | 10    | C04 | L3 |
