Question Bank

MODULE-3				
Sl.No	Question	RBT Level	COs	Marks
1.	Explain necessary conditions for deadlock	L2	CO3	5
2.	Problems on CPU Scheduling algorithms.	L3	CO3	10
3.	Explain Scheduling criteria	L2	CO3	5
4.	Explain Race condition with an example.	L2	CO3	6
5.	Explain Circumstances when scheduling is needed	L2	CO3	5
6.	Explain Multilevel queue and multi feedback queue scheduling.	L2	CO3	5
7.	Explain Role of dispatcher with a diagram and scheduling criteria.	L2	CO3	5
8.	Discuss Peterson's solution to handle Race Condition.		CO3	7
9.	Explain the following with example i. FCFS Scheduling ii. Shortest job first iii. Priority scheduling RR scheduling algorithms	L2	CO3	10
10.	Write a note on Mutex to handle Race Condition	L2	CO3	8
11.	Write a note on semaphores to handle race condition.	L2	CO3	8
12.	Discuss Critical section to handle Race Condition	L2	CO3	8
13.	Explain Resource allocation graph with examples.	L2	CO4	8
14.	Describe methods for handling deadlock	L2	CO4	10
15.	Write a note on Bounded buffer, Read writers, Dining phillosophers	L2	CO4	10
16.	Explain the principles of deadlock	L2	CO4	5
17.	Explain the methods for Deadlock prevention	L2	CO4	8
18.	Explain the methods for Deadlock avoidance	L2	CO4	10
19.	Explain the methods for Deadlock detection	L2	CO4	6

20.	Explain the methods for Recovery from Deadlock	L2	CO4	6
21.	Explain Deadlock characterization with suitable diagrams	L2	CO4	5
22.	Describe Banker's safety algorithm with example	L2	CO4	10
23.	Describe Banker's Resource Request algorithm with example	L2	CO4	10
24.	Problems on Banker's algorithm.	L3	CO4	10
